By picturing myself as a Full-Stack developer and concerning my long-term goals, I want to be an expert on the website development field, especially of progressive Web Applications, which predictably become the major competitor to mobile apps in the modern age.

Besides, people who I've worked with are always willing to write a recommendation letter for me and give me a positive performance review. I'm proud to say that my secure communication, outstanding attitude, and impressive leadership skills set me apart from other programmers.
